

CDM-OBS Table Change Proposal Guide

1. Create a New Issue

Go to the CDM-OBS GitHub repository: <https://github.com/ecmwf-projects/cdm-obs>, click “Issues” then create “New Issue”, and select the **CDM-OBS Table Change Proposal** template.

Template Metadata: - Name: CDM-OBS Table Change Proposal - Description: Use this template to propose edits or additions to CDM-OBS model tables. - Title: [Table Change] - Labels: table-edit, needs-review - Assignees: EddyCMWF and sjnoone

2. Fill in the Template

Required Fields:

- **Contributor Name:** Enter your full name.
- **Role:** Task Lead / Reviewer / etc.
- **GitHub Handle or Email:** Provide your username or email.
- **Target Table File Name:** Name of the table from cdm-obs/tables (e.g., instruments.csv).
- **Table Description:** Brief description of the table (e.g., list of observation instruments used in CDM-OBS).
- **Type of Change:** Select one or more from Correction, New entry addition, Unit/value update, Structural change, Metadata enhancement, Deprecation/retirement, Other.
- **Current Content:** Paste the relevant snippet from the table before changes.
- **Proposed Content:** Show the updated snippet clearly.

Optional Fields:

- **Motivation & Rationale:** Explain why the change is needed and reference any relevant standards/docs.
- **Impact Assessment:** Describe downstream effects, backward compatibility, and validation/testing considerations.
- **Reviewer Notes / Additional Comments:** Provide guidance for reviewers if necessary.

Example Submission

Contributor Name: Simon Noone

Role: Task Lead MU

GitHub Handle or Email: simon.noone@mu.ie

Target Table File Name: instruments.csv

Table Description: List of observation instruments used in CDM-OBS

Type of Change: New entry addition

Current Content: (leave empty for new instrument)

Proposed Content: RS-30 Radiosonde, Vaisala, Temperature/Humidity/Pressure

Motivation & Rationale: RS-30 is operational and widely used; data should be represented in CDM-OBS

Impact Assessment: Addition will not affect existing instruments, minimal validation needed.

Reviewer Notes / Additional Comments: Ensure proper formatting and table consistency.

3. Submit the Issue

Click “**Submit new issue**”. Your proposal is now saved and visible in the repository.

4. Governance Team Notification

The CDM-OBS governance team is automatically notified. But you may assign reviewers
Assignees: EddyCMWF and sjnoone or request clarification if needed.

5. Review Process

The request is reviewed at the **next scheduled CDM OBS -governance meeting**.
Governance team check accuracy, compliance with CDM-OBS standards, and impact on existing data.

6. Approval and Implementation

If approved, changes are implemented in a **separate Git branch**, undergo technical review (e.g., via pull request), and once validated, are **merged into the main branch**.

7. Completion

Confirm the change is visible in the table, close the issue, and the change becomes part of the official CDM-OBS tables.

Summary

Quick Flow: Create issue → Fill template → Submit → Review → Approve → Implement → Merge → Close
